What's driving you?

MOVE CONTROL

Premium Drive!

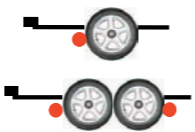

**MOVE
CONTROL
COMPACT**

The Innovative

The innovative "COMPACT" model combines the unique features of the MOVE-CONTROL with very small dimensions, requiring very little space being very low weight. With its very wide large diameter rollers and a powerful drive motor the system makes manoeuvring your caravan lots of fun. The remote control safely operates all functions such as on/off, hitching/unhitching, automatic, engaging/disengaging, and of course the manoeuvring procedures. The COMPACT weighs approx 25 kg and is universal for all caravans.

- soft start and soft stop
- engaging/disengaging by remote
- total caravan weight: up to 2,000 kg (single axle)
- TÜV approval

▸ mounting options

**MOVE
CONTROL
COMFORT**

The Tried and Tested

Simply mount the system to the chassis of your caravan and manoeuvre your caravan with the push of a button safely across the caravan pitch, into your storage area, for loading purposes on your own drive, or simply hitching the caravan to your vehicle coupling. Going over curbs and manoeuvring on rough grounds or steep inclines up to 25% is a piece of cake with the MOVECONTROL COMFORT.

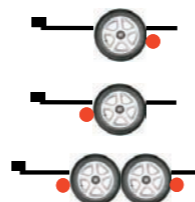

Wide driving rollers with a patented surface guarantee maximum traction, even on steep hillsides. Unique: the motors are located inside the chassis and not in the spray range of the wheels.

MOVECONTROL COMFORT TWIN 4WD is the powerful all wheel drive mover for caravans with twin axles. The patented control can even manoeuvre big caravans on a restricted space. 2,000 kg with a 15% gradient are no problem at all. With soft start and soft stop accurate manoeuvring operations can be performed within millimetre accuracy.

The optional MOTORDRIVE is used to engage/disengage the rollers with the remote control.

- cross actuation operation
- soft start and soft stop
- engaging/disengaging by remote (optional)
- total caravan weight: up to 2,000 kg (single axle)
- TÜV approval

▸ mounting options

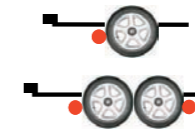

**RK
MOVER**

The Price-Conscious Model

The RK Mover also offers all major features of the Reich MOVECONTROL series – however at a very favourable price. Smooth manoeuvring and jerk-free startup on almost every ground and under any possible weather condition will be no problem at all. As on all MOVECONTROL models the control safely stops the caravan, even on steep hillsides.

- soft start and soft stop
- total caravan weight: up to 2,000 kg (single axle)
- TÜV approval

The Hot Tip

The MOVECONTROL ECONOMY is the low-priced start-up model without abandoning the familiar Reich quality. The system features very wide driving rollers made of aluminium which may be engaged or disengaged manually by the cross actuation bar. The powerful drive may be used to manoeuvre single-axle trailers up to a weight of 2,000 kg, while at the same time overcoming steep inclines up to 25% at a weight of 1,200 kg.

- cross actuation
- soft start and soft stop
- total caravan weight: up to 2,000 kg (single axle)
- TÜV approval

▸ mounting options

REICH offers the most comprehensive product program for all purposes

- in front of the axle
- behind the axle
- all wheel drive on twin axle
