GUIDANCE NOTES

Readings between 0 – 15% No cause for concern.
 Readings between 15 – 20% May require further investigation when compared with the average of all readings taken, consideration should be given to rechecking the area in three months.
 Readings greater than 20% - will identify areas needing remedial work. There may be early signs of water ingress or evidence of moisture. Again consideration should be given to rechecking the area in three months.
 When readings go above 30% structural damage may be occurring and deterioration is inevitable.
